Abbreviation Dictionary Audi exclusive

Introduction

Why do I need this „dictionary“?

Space is often limited to describe Audi exclusive features in desired detail in VNAS system. A likely cause is complicated wording and the need for necessary descriptions.

In order to simplify special orders a dictionary would be useful. The dictionary gives Audi exclusive components with abbreviation to achieve a shorter description and improved understanding.

The dictionary presents your country language, the German translation and the abbreviation(shown brackets), which is to be used in the system NVAS.
• Please order your desired special features with your car according to the sales programme. A package explains the components that may be altered.

• Please pay attention to the interior colour code.

• Please do not use the title of each package in your description as the content is already defined by order code. (e.g. PYB=leather interior Audi exclusive package 1)

• Please use the abbreviations we have given in this "dictionary" for your description of the features.
Abbreviation Dictionary Audi exclusive

Introduction

User manual (1/2):

- Please do not list components of a package separately if all parts should have the same colour (e.g. PYB=SSW + SMB+KN+TVE+PAD cognac).

- If you choose all components in one colour, only the order code and corresponding colour are needed (e.g. PYB= all in cognac).

- If you would like one base colour but certain contrasting features, please include the colour of the corresponding parts (e.g. PYB = all cognac, SF + KN black).

- Certain Audi exclusive features are not described as the contents are already defined by the order code (e.g. Audi exclusive line).
